

Dear: Tăci, Uitatele anepedagogicele praconomici Lucie Hortora (368)

Hi--mummy hope you are doing well with all your family members in your country. Also in our family members we are doing well. How is your country about climate? with our country it is rainy and windy every day. In this term we have not any electricity because it was short. In our school we have about twelve teachers teaching different subjects. I really love humanities languages which are history and government and C.A.E because I had told you my career in future what I want to be. Am working hard to achieve my goals. According to my performance am really doing my best during examination our teachers are appreciating for good work am doing in class. Although am not doing the best but atleast I am improved in class. We are approaching December holiday which I usually celebrate with our family members and this time round am welcoming you with all your family members for us to enjoy together as a family. And this holiday am planning to enjoy with my sister Helen. How can I make it to be possible even just to say I to her wherever she is. I wish my sister Helen good luck in all her everything she is doing. I would like to you Happy new year when it will change. Mummy great for me my dad although I don't know him. I appreciate the money for shopping which you send me last term I was happy about it even our family members. Lastly I requested about electronic devices to talk to you through one of them so that I have asked more questions as I can. would you have a lovely day with all your family. bye! bye! bye! Love you mummy.

Yours faithfully

So  
Sarah Ambasa
